PROFESSIONAL SUMMARY

Business intelligence and product analyst with 10+ years turning commercial and operational data into dashboards and analysis that teams use to make decisions. Expert SQL on large datasets, with hands-on BigQuery, Looker, Power BI, Tableau, and Excel. Works from the first question to the decision it changes, and leaves metric definitions and documentation behind so teams can self-serve. Domain experience across e-commerce marketplaces, SaaS, consumer telecom, and lending collections.

CORE SKILLS

Data and tools: SQL (expert), BigQuery, Looker, Power BI, Tableau, Excel, Python for data analysis, statistical analysis, data mining.
Analysis: cohort analysis, funnel analysis, retention and churn analysis, customer segmentation, ARPU analysis, trend and pattern analysis, budgeting and forecasting, P&L and commercial analysis.
Delivery: dashboard design, metric definition, data quality and validation, automated reporting, self-service analytics, stakeholder communication.

PROFESSIONAL EXPERIENCE

PT Amaan - Sr. Business Intelligence Analyst Sept 2023 - June 2024
Jakarta, Indonesia

- Built and maintained the reporting suite for recovery performance, field-team activity, and strategy, used across product, risk, and business reviews.
- Partnered with product, risk, and business teams to agree metrics and reporting cadence, then turned the analysis into strategy decisions.
- Ran advanced analysis, including correlation between workforce activity and collection target achievement, and flagged where performance needed correcting.

PT Gudang Ada - Sr. Product Analyst July 2022 - April 2023
Jakarta, Indonesia

- Delivered insight and dashboards for the Seller Marketplace and SaaS business units, covering seller performance and customer health.
- Partnered with product teams on strategy, using cohort, funnel, and behaviour analysis to explain retention and prioritise the roadmap.
- Owned analysis and reporting for inventory price recommendation and healthy customer journey, from metric definition to the dashboard teams used.

OLX Indonesia - Advance Analytics Specialist Aug 2018 - March 2020
Jakarta, Indonesia

- Produced reports, insight, dashboards, and strategy input for the OLX business core using statistical techniques and SQL.
- Identified and interpreted trends and patterns in large, varied data sets, and recommended where the business should act.
- Worked with marketing and growth teams to prioritise initiatives and to build budgeting and forecasting across business units.

PT Nokia Solutions - Data Analytics APJ Aug 2017 - Aug 2018
Jakarta, Indonesia

- Analysed Telkomsel customer behaviour to improve sales activity across selected regions.
- Built campaigns that increased month-over-month revenue in target regions.

PT XL Axiata, Tbk - Sr. Officer Postpaid Business Analytics Dec 2015 - Aug 2017
Jakarta, Indonesia

- Prepared post-performance reporting for every postpaid marketing product initiative, so each launch had a clear read on revenue and usage.
- Owned regular business analytics reports and dashboards, and provided insight on current marketing performance.
- Coordinated with data engineers to maintain the data foundation behind reporting.

PT XL Axiata, Tbk - Officer in Customer Analytics Sept 2013 - Dec 2015
Jakarta, Indonesia

- Generated actionable insight on customer behaviour and developed customer value management solutions to improve marketing effectiveness.
- Designed and evaluated churn, usage, and revenue programmes with pricing and campaign teams, including retention frameworks that increased customer spend and ARPU.
- Monitored usage patterns across all segments, flagged where corrective action was needed, and managed delivery of the recurring reports.

SELECTED ACHIEVEMENTS

- **Retention.** Diagnosed a 30-day retention drop in a seller SaaS app using cohort and funnel analysis. Recommended a guided onboarding flow, which the product team shipped, and 30-day retention improved.
- **Operations.** Built automated attendance and performance monitoring for field and remote collection teams. Supervisors intervened on lapses in minutes rather than days, replacing manual audits.

EDUCATION

Master in Information Technology, Universitas Indonesia, 2014-2015.
Bachelor in Informatics, Telkom Institute of Technology, Bandung, 2008-2012.

LANGUAGES

Bahasa Indonesia (native), English (professional working proficiency).
